

## Programme Outcomes – B. Des (ID)

**1. Interior Design Knowledge:** Apply the knowledge of space planning, material technology, building services and user psychology to design projects holistically.

**2. Problem Analysis:** Identify interior environment issues, analyse and synthesize human experiences and behaviour patterns and apply findings to design solutions.

**3. Design and Development of strategies:** Design solutions that meet the specified user needs with appropriate consideration for user well-being and experience.

**4. Conduct investigations of complex issues:** Use research based knowledge and methods to analyse, synthesize and interpret data to generate appropriate design solutions.

**5. Modern tool usage:** Identify, select and apply appropriate tools and technology for understanding and designing the interior environment.

**6. Interior Designer and Society:** Assess the societal, health, safety, legislative and cultural issues through the knowledge and skills gained for delivering responsibilities relevant to the Interior Design profession.

**7. Environment Sustainability:** Understand the impact of interior design on society and environment and demonstrate the knowledge through sustainable interiors.

**8. Ethics:** Apply principles and commit to professional ethics and responsibilities of design profession.

**9. Individual and teamwork:** Function effectively as an individual and as a member or leader in diverse teams and in multi-disciplinary settings.

**10. Communication:** Communicate effectively with various stakeholders of the project to comprehend, document and write reports, make effective presentations, and give and receive clear instructions.

**11. Project management and Finance:** Demonstrate knowledge and understanding of Interior Design and management principles in individual practice as a member and a leader in a team to manage projects in multi-disciplinary environments.

**12. Life-Long learning:** Ability to engage in independent and lifelong learning, recognizing the need and technological advancements.
